Notes:

1. Quoted ranges are from the Green Vehicle Guide: <https://www.greenvehicleguide.gov.au> wherever possible. Those not yet available in Australia use the NEDC ratings as they are closest to the current Australian ratings scheme.
2. Real world ranges are US EPA ranges except for Renault, where manufacturer quoted real-world range used.
3. Approximate base model price based on currently available vehicle sales listings, inc on-road costs (ORCs).
4. ETA: Q=quarter. Q1=Jan-Mar; Q2=Apr-Jun; Q3=July-Sept; Q4=Oct-Dec
5. WLTP range - will not be rated under NEDC until Australian arrival
