

# chargeslot

Introducing 'chargeslot', a mobile application to **host** your EV charger for free or **book** EV charging stations from your locals.

As EVs continues to grow year-by-year it would be hard to find an unplugged public charging stations as one or the other EVs would be topping up and you wouldn't have realised until you reach to that spot. Hence in order to give a better peace of mind, 'chargeslot' allows you to book EV charging stations in advance.

Chargeslot allows you to host your residential EV charger for **free** by which you can earn by unlocking your residential EV charging station to public at your terms, where availability, duration and cost for your EV charger can be decided by you. Hence by hosting your EV charger on chargeslot platform, you can accelerate your payback period and generate an extra income when your residential EV charger is not in use.

Chargeslot provides similar benefits to commercial EV charging stations, by providing greater visibility to public and increase your bookings efficiently and in controlled fashion, and better utilisation.

Chargeslot fills the gap for EV drivers who cannot charge EVs at homes or having no access to off-street parking by assisting them to book an EV charging station from locals.

Thus, chargeslot enables more charging options for EV drivers, encouraging EV drivers to hit road without worrying about charging stations availability and enabling zero-carbon travel.

By joining waitlist, you can unlock your in-app perks. For more information, head to [www.chargeslot.com.au](http://www.chargeslot.com.au)
